Autumn Price List of Hardy Lilioms and Dutch Bulbs

1933

LIBRARY

RECEIVED

★ AUG 14 1933 ★

U. S. Department of Agriculture.

OFFERED BY

William N. Craig

FRONT STREET AT FEDERAL
WEYMOUTH, MASS.

A very cordial invitation is extended to all interested in hardy gardening to look over our gardens. May is a good time to see Dutch Bulbs, Lilies are in season from early June until mid-October, Herbaceous Perennials are in flower from April until December. Even in winter we usually have some bulbs or herbs showing flowers in warm locations.

The great fluctuations in currency since the United States abandoned the gold standard with the severe depreciation of the dollar abroad makes it difficult to quote prices on bulbs imported from Holland, these however, will be found no higher than a year ago, and in case of currency stabilization in advance of bulb importations our customers will receive the benefit of any price changes.

We purchase only the highest quality of all bulbs and having a low overhead cost are able to give very attractive prices. We cordially invite an inspection of our imported and domestic bulbs, practically all of which are here by September 15, many much earlier.

LILIUMS

are our leading specialty. We grow these in thousands in Weymouth in full sunshine, and our collection is without a rival in New England. From a very small beginning a few years ago a large business has been built up in these glorious hardy bulbs, and shipments are made to all parts of the United States as well as Canada and Great Britain. Virtually every variety listed may be found growing here and unlike the majority of dealers we are not dependent on bought in stock, except in the case of a few varieties. The superior advantages of home grown bulbs with their greater plumpness must be apparent to every grower of these beautiful bulbous plants.

Some varieties like candidum and testaceum are ready in August, a very large number are to be had in September, and this month and October are the best months in the year for the planting of the great majority of Lilies. The auratums, speciosums, sulphureums, and a few other varieties can be planted later and it is better to get these in during late fall rather than wait until spring. Some of our most successful plantings of Lilies have been made in late December and January, removing a crust of frost to get into the ground. Very little winter covering is necessary for Lilies, our own beds get virtually nothing at all. So long as drainage is good there need be no fear of Lilies winter killing. To extend the flowering season plantings of such varieties as speciosum, auratum, Henryi, regale, sulphureum, elegans, tigrinum and some others can be made in spring.

Our first Lilies to open in 1933 were tenuifolium and monadelphum, both during late May, the greater number of Lilies bloom during June and July but quite a number flower later and we usually have speciosums and sulphureums until mid-October which makes a fairly long season.

Plant candidum only 1½—2 inches deep, testaceum and chalcedonicum not over 3 inches. All varieties making roots only from below the bulbs should be planted shallow. Stem rooters like regale, auratum, speciosum, Henryi, sulphureum, Sargentiae, and Willmottiae require covering 8 inches and even more is better should soil be very light. European varieties like candidum, chalcedonicum, monadelphum, martagon, testaceum and Pyrenaicum like a well sweetened soil while the Asiatic varieties either prefer one which is alkaline or neutral. Regale seems to grow equally well in an acid as a sweet soil. Some varieties like candidum, testaceum, chalcedonicum, martagon, Japonicum and rubellum are best laid on their sides at planting time, all should be bedded in sand and covered with it before being filled in.

Very rententive soils may be improved by adding peat moss, sharp sand and fine coal ashes. As a summer mulch peat moss is excellent, but do not use it for the European varieties. Where the more tender and doubtful varieties are being tried it will assist very much to lay strips of tar paper over the clumps to shed water in winter.

Lilies are effective in perennial borders, but when planted there should not go too near husky growing plants, when mulching beds with manure avoid scattering it over the Lilies. In beds or borders by themselves with a background of evergreen or not too robust deciduous shrubs Lilies do remarkably well, a groundwork of violas, or Nepeta Mussini may be used if desired. In rhododendron or azalea beds auratum, superbum, pardalinum, Canadense, Henryi and Grayi do well but do not use any of the large bulb rooting varieties. For the wild garden our native varieties like Philadelphicum, Grayi, Canadense, superbum and Carolinianum are good, so is tigrinum, the elegans and umbellatum varieties, and croceum. For rock garden plantings some of the

Each Doz.

Auratum Var. Virginalis (Wittei). Carries broad well overlapping petals which are spotless but with broad gold bands, a very lovely form.

.75 each, 8.00 doz.

Auratum Wild Collected Bulbs.

These bulbs are smaller than the varieties which are cultivated, freedom from disease is claimed for them and we would recommend customers to try them. .40 each, 4.00 doz., 30.00 per 100

Backhouse Hybrids. This grand race of Lilies was raised by the late Mrs. R. O. Backhouse in England. They are the results of crosses made between Martagon and Hansonii, two very excellent Lilies. The available stock of these in the world is still quite limited. All bulbs offered are of blooming size and these will attain a height of 5—6 feet within two years.

Brocade. Very vigorous. Color orange yellow, rosy pink without, interior dotted and marbled pink and chocolate.. 4.00

Golden Orb. Easily the grandest of all the Backhouse hybrids. Color yellow with a green centre, interior dotted crimson, light brown bands outside. This variety is very scarce, in fact the entire stock in the world is so limited that only two or three firms offer it 5.00

Mrs. R. O. Backhouse. A superb and very vigorous hy-

	Each	Doz.
brid, color orange yellow spotted purple	3.00	
Sceptre. Extremely vigorous, attaining a height of 6 feet. As many as 40 of the star- shaped flowers, which are orange colored with a pinky buff shading, are carried to a stem	3.00	
Sutton Court. The reflexing orange yellow flowers of this variety are heavily spotted with purple, exterior of petals is shaded with pink and inter- ior with pale yellow. Very robust	3.00	
Bolanderi. Californian lily with reddish purple flowers, spotted dark purple. Some- thing in the way of Columbi- anum75	
Bakerianun (Lowi). This Lily which we flowered quite a number of this season is a na- tive of Burmah and the Shan States. The flowers are pen- dulous, trumpet shaped, wide, and rather short. The pure white flowers have ribs of del- icate green within and there are numerous reddish spots in the throat, 1—4 flowers are carried per stalk. Attains a height of 2—3 feet. Must have a warm, sheltered and well drained position outdoors and I suggest laying tar paper over the plantings to keep bulbs dry in winter. Fine for pot culture. Extra strong bulbs	2.00	22.50
Batemanniae. A superb lily blooming in late July. The		

	Each	Doz.
stems attain a height of 3—4 feet and this season many carried 20—28 flowers each. The upright facing flowers are of a rich orange apricot color. We have a grand stock of this splendid lily.		
	.35 each, 4.00 doz.,	30.00 per 100
Browni Odorum. An early July flowering Lily with large trumpet shaped flowers purplish without and creamy white within. Distinct fragrance	1.50	16.50
Browni Colchesteri. Cultivated bulbs secured originally from England. A very fine form. This Lily needs a warm and very well drained location. Is excellent for pot culture75	8.00
Bulbiferum. A native of Central Europe this lily proves to be a good grower in North America. The bright orange red flowers are dotted deep purplish black and tinged or blotched yellow in the centre. Flowers in late June or early July50	5.00
Callosum. Flowers are orange red, unspotted, reflexed in the same way as superbum and Chalcedonicum, loves full sunshine, blooms late30	3.00
Canadense. A beautiful and graceful native lily succeeding well in either sunshine or shade. Fine either in the garden or for naturalizing. The drooping reflexing flowers are yellow to reddish in color, heavily spotted within.		
	.20 each, 2.00 doz.,	12.50 per 100

	Each	Doz.
Extra Big Cultivated Bulbs.		
.40 each, 4.00 doz.,	30.00	per 100
Canadense Flavum. The yellow form of the Canadian lily. Succeeds splendidly in full sunshine but will also thrive in fairly heavy shade.		
.25 each, 2.00 doz.,	15.00	per 100
Canadense Rubrum. The red form of this charming lily.		
.25 each, 2.00 doz.,	15.00	per 100
Candidum (Madonna Lily). The most immaculate of all hardy lilies. Likes a well sweetened soil. Requires shallow planting not over 1½-2 inches deep. Lay bulbs on their sides after rolling in sulphur, pack well in sand. As this Lily makes a rosette of leaves in late summer, early planting is desirable. Looks well associated with Delphiniums but do not allow perennials to crowd them too much. We handle both home grown and North of France bulbs.		
.25-.35-.50 each, 3.00-4.00-6.00 doz.		
\$20.00-30.00 to 45.00		per 100
Candidum Peregrinum. The black stemmed form of Candidum, not at all common, freer from disease than the type. Best imported bulbs from England75	8.00
Carniolicum. Often referred to as "the nodding Red Lily" this variety is a native of Carniola (whence comes its name), Istria, Dalmatia and other states, rather rare in cultivation	1.50	

	Each	Doz.
Carolinianum. Similar to superbum but is smaller and less husky, loves sunshine40	4.00
Centifolium. A magnificent new lily of great vigor and hardiness, introduced by the late Reginald Farrer. The immense pure white trumpet shaped flowers are flushed with yellow at the base of the trumpet, outside the trumpets are streaked with green and light brown. Stem rooter and requires deep planting. This seems destined to become one of our dominant garden lilies when stocks increase. Good flowering bulbs	2.00	22.50
Cernuum. This Chinese lily has grass-like foliage and very wiry stems. Flowers are lilac rose in color, spotted wine color, fragrant and the plants are similar to tenuifolium in habit. Quite a scarce lily60	6.00
Chalcedonicum (Scarlet Turks Cap Lily). A native of Greece and one of the parents of testaceum. The brilliant scarlet recurving flowers are produced in July. Most of our bulbs carried 3—5 spikes each last season.		
Extra large bulbs	1.50	15.00
Strong flowering bulbs	1.00	10.00
Columbianum. A fairly dependable variety from Oregon and other Pacific coast states. The color is golden yellow, spotted red, likes a moist location ..	.35	4.00
Concolor. This charming rock garden lily comes to us from Siberia, it is an early bloomer		

with rich crimson scarlet flowers facing upwards, rarely exceeds 18 inches in height. Follows tenuifolium in its season of bloom40	4.00
Coridion. Resembles concolor in its habit of growth. Color deep yellow with dark spots.	.40	4.00
Croceum. This is the true old orange lily of British gardens where it is seen growing luxuriantly on every hand, grows much taller than umbellatum and blooms later, not infrequently carrying 16—20 flowers to each stem. Color rich orange, one of our very best lilies40	4.00
Croceum var Chaixii. A very fine dwarf form, pure in color, grows only a foot in height. Bulbs of this variety are as yet very scarce. Native of the Alps Maritime	1.50	
Davidi (Thayerae). This rather scarce Chinese lily is of graceful habit and while the flowers are similar to those of Willmottiae they are produced later, it has a sturdier stem however. Flowers are cinnabar red in color and the foliage is narrow and grass-like.		
Extra strong flowering bulbs	1.00	10.00
Second sized bulbs of flowering size50	5.00
Davuricum. A handsome Siberian lily flowering early, usually umbellatum is sold for it, the flowers more nearly resemble our native Philadelphicum than any other variety being orange red in color,		

	Each	Doz.
spotted black, upright and rather cup shaped30	3.00
Dalhansoni. A splendid hybrid between martagon Dalmaticum and Hansonii with great vigor and much of the coloring of the darkest of the martagons. Bulbs scarce	2.50	
Duchartrei Farreri. One of the late Reginald Farrer's introductions and referred to by him as resembling a "white marbled martagon." This does very well in New England and is a very charming Lily	2.00	
Elegans (Thunbergianum). A dwarf growing and early flowering type of lilies coming in several colors. Good both for the border and the rock garden as well as the wild garden. There are some very fine forms of this easily grown lily. Fine mixture.		
.20 each, 2.00 doz.,	15.00	per 100
Elegans Alice Wilson. An excellent yellow form, dwarf and carrying extra large flowers, also forces very well50	5.00
Elegans Aureum Nigro-Maculatum. Apricot yellow with black spots25	2.50
Elegans Atro-Sanguineum. Dark red, crimson in centre..	.25	2.50
Elegans Golden Gleam. A very pretty yellow form, dwarf and very early40	4.00
Elegans Leonard Joerg. A good deep apricot variety with black spots. .30 each, 3.00 doz.,	22.50	per 100
Elegans Peter Barr. Fine golden yellow variety, lightly spotted50	5.00

	Each	Doz.
Elegans Prince of Orange. A very dwarf yellow form of Elegans40	4.00
Elegans Red Star. Splendid red, suffused with orange50	5.00
Grayi. Named in honor of Prof. Asa Gray, the noted botanist. Coming to us from the mountains of Virginia and North Carolina, this lovely and graceful lily takes kindly to garden culture in New England. The pretty red tubular shaped flowers are yellow, spotted brown and are very freely produced. Prefers some shade like many other lilies, but thrives well in full sunshine35 each, 3.50 doz., 25.00 per 100		
Giganteum Himalaicum. Not to be confounded with the form of longiflorum going under the name of giganteum, this is the tallest growing and most noble of all lilies. Not a plant for the open garden, the ideal place for it is in an open glade in a piece of woodland where it can be sheltered from strong winds. The large bulbs should be planted shallow in soft mucky ground in which coarse sand has been freely mixed. Spring planting is best. The large tubular shaped flowers are semi-pendant and pure white in color with a purplish tint near the base and purple midribs, the flowers are very fragrant. Under good culture this lily attains a height of 10—12 feet and is very noble. We bloomed quite a		

	Each	Doz.
number of this superb lily in 1932.		
Very large imported flowering sized bulbs from Scotland ..	3.00	33.00
Hansonii. Hanson's lily is easily one of the best 6 varieties in cultivation. Leaves are carried in whorls and persist until quite late. The yellow flowers are slightly reflexed, yellow in color with brown spots and fragrant. Succeeds well in both sunshine and shade. A late June bloomer.		
Extra large bulbs75	7.50
Strong flowering50	5.00
Henryi. Sometimes called the "yellow speciosum." The orange yellow reflexing flowers are produced in August and early September. This lily produces very big bulbs, often attains a height of 7—8 feet or more, and is not only very floriferous but absolutely dependable, carries very rich green foliage. Must be planted 8—10 inches deep for best results25, .50, .75 each 2.50, 5.00, 7.50 doz. \$20.00, 35.00, 50.00 per 100	
Humboldtii Magnificum. Probably the best of the Californian lilies. Has done very well with me in the open but thrives better in an open woodland glade where it will be protected from cutting winds. Flowers in form resemble superbum but are more heavily spotted with purple. Strong cultivated bulbs, far superior to those collected60	7.00

Each Doz.

Japonicum (Krameri). The most lovely of pink Japanese lilies. This has done amazingly well outdoors with me even when planted as late as Christmas week, many stalks have carried 6—7 flowers each in the open field and unprotected. The stories told in many catalogues that this lily is delicate and must be pot grown altogether is pure nonsense. Give it well drained soil, use plenty of sand around the bulbs laying them on their sides. Flowers mainly in July but will persist until well into August. Makes a fine variety also for pot culture.

.50 each, 5.00 doz., 35.00 per 100

Kelloggi. A very dainty and pretty Lily from North Western California, the stems attain a height of 2—4 feet, flowers are pink spotted purple and are fragrant, likes a well drained position in a rockery, or on the banks of a sloping piece of woodland

.50 5.00

Longiflorum Formosum. This form of the "Easter Lily" is splendid for forcing and easily forces into flower earlier than giganteum, it usually also grows much taller. It is not generally known that it is also excellent for outdoor culture, flowering in the vicinity of Boston about July 10. Plant 8—10 inches deep and you need have no fear of winter killing. Extra large bulbs

.50 5.00

	Each	Doz.
<p>Longiflorum Giganteum. This the popular lily for Easter forcing, is also a grand variety outdoors in New England. Plant in November 8—10 inches deep. Flowers produced in the open are very much larger than under glass and quantities of large bulblets will be found on the stems at digging time, some of these will flower the next season. Proves perfectly hardy.</p>		
Extra large bulbs50	5.00
<p>Longiflorum Harrisi. The earliest flowering of the longiflorum varieties under glass this variety has with us flowered latest outdoors, nor has it grown so tall as either giganteum or formosum. Bulbs of this lily are ready early in August. We find this Lily perfectly hardy but outdoor planting should be delayed until late October.</p>		
Extra fine 9—11 inch bulbs..	.50	6.00
<p>Longiflorum Ukeyuri. Often listed as L. Alexandrae and as a form of Japonicum from which it is entirely distinct. The huge flowers face upright and are broader than in other forms of longiflorum. A superb variety. Stock limited</p>		
	2.00	
<p>Marhan. A fine hybrid lily raised between Martagon and Hansonii, has a fine constitution. Flowers are fairly intermediate in character. Good flowering bulbs</p>		
	1.50	17.50
<p>Marhan, var. Ellen Willmott. A lovely hybrid between Mar-</p>		

	Each	Doz.
<p>tagon album and Hansonii Color clear orange with red- dish brown spots and streaks extremely vigorous</p>	2.00	
<p>Martagon. The old purple mar- tagon lily often attains a height of 6 feet, carrying up to 30 flowers per stalk. Flow- ers in mid-June near Boston, cover 4 inches.</p>		
	.25 each, 2.50 doz.,	18.00 per 100
<p>Martagon Album. The white martagon lily produces its waxy white recurving flowers a few days later than the purple variety, it is one of the most lovely and graceful lilies in cultivation, has a strong constitution.</p>		
Very large bulbs60	7.00
Fine bulbs50	5.00
<p>Martagon Dalmaticum. One of the finest forms of martagon, very robust flowers are occa- sionally wine red in color but usually deep glossy purple appearing black in the dis- tance. Choice and scarce</p>		
	2.50	
<p>Martagon Cattanae. Rich glossy blackish crimson flowers, a remarkable form, very scarce</p>		
	3.00	
<p>Maritimum. This Californian Lily is rather closely allied to the better known Canadense. The reflexed orange yellow flowers are tipped red and spotted light purple</p>		
	.60	6.50
<p>Maximowiczii. A late August flowering lily, resembles tig- rinum a little in habit and flowers but is a later bloomer and rather less vigorous. The recurving red flowers are</p>		

	Each	Doz.
spotted purplish brown. Cover bulbs 6—8 inches40	4.00
Medeoloides. A good rock garden lily of martagon habit, flowers are scarlet, shaded apricot and occasionally spotted black50	5.00
Monadelpum Szovitzianum (Colchicum). A very beautiful lily from the Caucasus. Likes very well drained ground and if a sheet of tar paper is spread over the bed in winter to exclude water they will do all the better. The rich yellow fragrant flowers appear in early June arranged like pendulous bells around a sturdily graceful stalk.		
Extra fine bulbs50, .75, 1.50, 5.00, 7.00	
Occidentale. Believed to be a hybrid between maritimum and pardalinum. Flowers are deep blood red with a few maroon spots in centre, loves moisture. A very rare variety.		
Ochraceum. Often confounded with Nepalense from which it is quite distinct. Shows much variation in both flower and leaf. Color is yellow but not of one fixed shade, usually the tube is heavily stained with wine purple, a fine lily for pot culture and may prove amenable to open air conditions when better understood. Strong bulbs	2.00	
Pardalinum. A very good Pacific coast lily flowering in July. Of vigorous habit and easily attaining a height of		

	Each	Doz.
5—6 feet. The recurving flowers are bright orange in color spotted with deep crimson ..	.25	2.50
Pardalinum Giganteum. A magnificent form with larger and much more brilliant flowers than the type, possesses great vigor, our plants this year attained a height of 8 feet. We offered this variety for the first time in the east in 1930 and it has made good everywhere. .50, 1.00 each, 6.00, 10.00 doz.		
Parryi. A lovely Pacific Coast lily growing 4 feet in height. Lemon yellow in color with light chocolate brown spots, has a delightful fragrance. Likes plenty of leaf mold or peat moss and a moist location. Cultivated bulbs75	8.00
Parvum. A very pretty and graceful Lily from the Sierra Nevada Mountains which succeeds very well in the eastern states. Flowers are recurving, orange yellow in color and 1½ to 2 inches across50	5.00
Parvum Luteum. A pure yellow form which is very highly prized. One of the most charming of our Pacific Coast Lilies	.60	3.00
Philadelphicum. A fine lily native to our eastern states. The cup shaped flowers are of large size and carried 1—6 to a stalk. The orange colored flowers shade to scarlet at the tips and are rather heavily spotted, prefers shade and some low herbage to cover the ground, .20 each, 2.00 doz., \$12.50 per 100		
Extra large bulbs40	4.00

	Each	Doz.
Philippinense. This lily from the Philippines is too tender except for pot culture. Plant several of the small bulbs in 6 inch pans for best results. The long narrow pure white trumpet-shaped flowers are very fragrant and are usually solitary carried on wiry stems	.50	5.00
Philippinense Formosanum. A hardy form of the above lily from the mountains of Formosa which winters well in northern New England. The trumpets are colored brownish externally. A late bloomer not usually coming in season until August50	5.00
Princeps. A hybrid between regale and Sargentiae and in our estimation better than either parent. This superb lily was raised at the Dominion Experimental Farms, Ottawa, Ontario. It greatly extends the regale season as it flowers nearly a month later, the immense trumpets are larger and purer than those of regale, the exterior of the trumpet having hardly any trace of the brownish purple coloring seen in regale, being green and white. In 1932 we had this Lily in splendid bloom as late as August 20. It has an even sturdier stem than regale and carries as many as 15—20 flowers per stalk once established. We consider this one of the great Lilies of the future which everyone will want to grow. This season we		

	Each	Doz.
have a grand stock of bulbs which we offer at attractive prices.		
Strong flowering bulbs	1.50	15.00
Fine flowering bulbs, .75-1.00 each, 8.00-10.00 doz.		
Pyrenaicum. The yellow turks cap lily from Europe blooms with tenuifolium in early June carrying many small greenish yellow flowers with brown spots. The foliage is graceful. Bulbs are large and should be covered 6 inches50	5.00
Regale. Easily the most widely planted and popular lily in America today. Succeeds under widely different conditions and is hardy, vigorous, floriferous, disease proof and absolutely dependable. The fragrant flow- ers have a delicate pink suf- fusion with a sulphury throat, externally the colorings show reddish brown through the white. We have a big stock of this glorious lily and have this season marked prices down substantially.		
Extra big bulbs, 9—11 in size, .50 each, 5.00 doz., 40.00 per 100		
Large flowering bulbs, .40 each, 4.00 doz., 30.00 per 100		
Good flowering bulbs, .25 each, 2.00 doz., 18.00 per 100		
Small flowering bulbs, .15 each, 1.50 doz., 10.00 per 100		
Bulbs to flower a year later, .50 doz., 3.00 per 100		
Regale X Browni. Another fine late blooming hybrid, just as vigorous as regale and with the Browni coloring outside the trumpets	1.50	

	Each	Doz.
Roezlii. A moisture loving Lily from California, does very well in New England, is a moisture loving variety, stem rather slender, leaves long, slender and crowded, flowers are of a clear reddish orange, recurving and are dotted maroon50	5.00
Roezlii, Crimson Form. This is like the type but the flowers are of a deep blood red lightly dotted maroon, long slender foliage50	5.00
Rubescens. This is the Redwood or Chemise Lily. Tall slender stalks and very fragrant tubular flowers, these are white with purple dots when opening changing to deeper purple, and varying shades may be seen on the same plants. Give very good drainage50	5.00
Rubellum. A pretty very early flowering dwarf lily, fine for the rock garden in well drained pockets, the flowers are rather light pink in color and tube shaped, is also fine for pot culture.		
.40 each, 4.00 doz., 30.00 per 100		
Sargentiae. Mrs. Sargent's lily flowers about three weeks later than regale, the large tubular flowers are pure white within, outside they are reddish brown. Plant at least 8 inches deep, be sure soil is well drained and this lily will thrive with you although not to the same degree as regale	.75	8.00
Shelburne Hybrid. A very fine and vigorous hybrid between		

	Each	Doz.
Sargentiae and regale raised in Shelburne, Vermont, resembles a much glorified Sargentiae but is a hardier and huskier grower than that variety	2.00	22.50
Speciosum Album. Large reflexing pure white flowers which are in season outdoors from mid-August until October. Also good for pot culture.		
	.35-.50 each,	4.00-6.00 doz.
	27.50-45.00 per 100	
Speciosum Album Kraetzeri. A striking pure white form with green bands running down the centre of each petal	.50	6.00
Speciosum Magnificum. The large recurving flowers are rich carmine pink, margined white, a very fine variety.		
	.25-.50 each,	3.00-5.00 doz., 20.00-40.00 per 100
Speciosum Melpomene. Dark carmine shaded purple, heavily spotted and margined white, an extra richly colored form.		
	.40-.50 each,	4.00-6.00 doz., 30.-40.00 per 100
Speciosum Rubrum. Carries both green and dark stems with rose colored flowers of varying shades.		
	.25-.50 each,	2.50-5.00 doz., 20.00-40.00 per 100
Sulphur-Gale. A fine hybrid between sulphureum and regale, very vigorous and hardy, extends the flowering season for regales. The flowers are in form like sulphureum and approximate regale in color..	.50	5.00
Sulphureum. A superb late flowering lily from Upper Burmah which proves perfectly hardy in New England. The immense		

	Each	Doz.
trumpet shaped flowers are pale yellow within, deepening towards the throat, the outside is tinted brownish red. Is also grand for pot culture. A late blooming variety attaining a height of 5—6 feet.		
Good flowering bulbs	1.25	13.50
Extra large flowering bulbs..	1.75	20.00
Sutchuenense. Somewhat similar to Willmottiae but has a much sturdier stem and the flowers are spotless, an exceptionally fine Lily. Stock limited	2.00	
Superbum. A magnificent North American lily, thrives in sunshine or partial shade, especially fine in rhododendron beds where it will attain a height of 10 feet. The bright orange recurving flowers are heavily spotted, likes a moist soil but demands good drainage like all lilies.		
Very large cultivated bulbs,		
.40 each, 4.00 doz., 30.00 per 100		
Strong flowering bulbs,		
.20 each, 2.00 doz., 15.00 per 100		
Tenuifolium. Our earliest flowering lily each year is the Siberian coral lily, in 1933 the first flowers opened on May 27. A gem for the rock garden. Graceful foliage and brilliant recurving red flowers carried 6—20 on a stem. This lily, under good conditions grows 3—5 feet high and we have counted 35 flowers to a stalk. Should be in every collection.		
Extra large bulbs,		
.40 each, 4.00 doz., 30.00 per 100		

	Each	Doz.
Strong bulbs,		
.25 each, 2.50 doz.,	16.00	per 100
Tenuifolium Golden Gleam.		
Usually classed as a hybrid between tenuifolium and marginatum album but is more probably a sport, comes true from seed, carries numerous rich orange yellow flowers40	4.00
Testaceum. The gloriously beautiful Nankeen Lily is the only known natural hybrid lily in existence, a cross between candidum and chalcedonicum. It should be planted shallow and prefers a well sweetened soil. Should be planted in fall, in spring only from pots. The exquisite nankeen yellow flowers are carried 6—12 to a stalk and open in late June and early July. There is a demand for this lily far in excess of the supply. We have a large stock of splendid bulbs.		
Extra large selected bulbs ..	1.50	16.50
Strong flowering bulbs	1.00	10.00
Tigrinum. The old Tiger lily often seen growing splendidly about abandoned homes and along roadsides, gives a fine touch of color in mid-August, splendid for naturalizing.		
.20 each, 2.00 doz.,	12.50	per 100
Tigrinum Flore-Pleno. A double form which is very pleasing, flowers a little later than the single form, rather less brilliant in color30	3.00
Tigrinum Fortunei Giganteum.		
Extremely vigorous, growing 6 feet or more in height, sometimes carrying 30—50

	Each	Doz.
dwarfer than Darkest of All and the flowers are somewhat larger. Must be seen to be truly appreciated.		
.35 each, 3.00 doz.,	22.50	per 100
Umbellatum Orange-man. Rich orange and with extra large flowers25 each, 2.50 doz.,	18.00 per 100
Umbellatum Prince of Wales. Early splendid yellow bloomer, extra large flowers	1.00	10.00
Umbellatum Sappho. Very good light orange red variety.		
.25 each, 2.50 doz.,	18.00	per 100
Umbellatum Splendidum. The finest of all the highly colored varieties, rich vermilion and orange, very strong grower, carries immense heads of bloom50	5.00
Umbellatum Vermilion Brilliant. Blood red flowers, with crimson shading, lightly spotted black. A grand variety30	3.00
Wallacei. Warm apricot with rose shading, a charming Japanese form of elegans flowering in August40	4.00
Washingtonianum. A beautiful Pacific Coast lily flowering in late June. The fragrant flowers open white, turning purplish pink as they age, 25 or more flowers are carried on good stems. This variety should be given a well sheltered position or winds will spoil the lovely but rather fragile flowers. Our bulbs are cultivated and not to be compared with the badly dried up collected ones usually sold. Extra large bulbs.		
.75-1.00 each,	8.00-10.00	doz.

Each Doz.

Willmottiae. Miss Willmott's lily is vigorous and hardy, attaining when established a height of 5—6 feet and carrying up to 30 flowers per stem. The recurving flowers are of a vivid reddish orange color and appear about mid-July. The foliage is graceful and the plant of a very refined appearance.

Extra large bulbs	1.00	10.00
Strong flowering size75	7.50
Nice flowering bulbs40	4.00

The foregoing is not a complete list of our lilies, amongst other varieties which we now have small stocks of, or will receive shortly are: Horsfordi, Jankae, Neilgherrense, Nepalense, Thompsonianum, Wallichianum, Wardi, and others.

LILIUM SEEDS

For those who may desire to raise Liliiums from seed we can furnish the following amongst other varieties. For details of culture from seeds. I would refer buyers to "Lilies and their Culture in North America." Many Lilies will germinate in 3-4 weeks, others will lay dormant for a year and then appear thickly. Seeds of many varieties are ready now and others will soon be gathered.

Amabile, Auratum, Auratum virginale, Auratum platyphyllum, Bakerianum, Brocade, Callosum, Croceum, Cernuum, Cordifolium, Canadense flavum, Canadense rubrum, Davidi, Elegans, Ellen Wilmott, Grayi, Henryi, Marhan, Martagon, Martagon album, Japonicum, Monadelphum, Mrs. R. O. We have in all some 64 varieties. Packets are liberal ones, small sized, 25 cents each, \$2.50 doz., large size 50c each, \$5.00 doz. 25 varieties and selections for \$5.00.

LILIES FOR THE ROCK GARDEN

The following amongst other Lilies are especially well adapted for use in the Rock Garden. Elegans (all varieties), tenuifolium, tenuifolium Golden Gleam, callosum, Wallacei, concolor, amabile, rubellum, Philadelphicum, parvum, Roezlii, cernuum and medeoloides.

New Practical Work on Lilies

“Lilies and Their Culture in North America”

By WILLIAM N. CRAIG

Covers the Culture of Lilies both in the Garden and Greenhouse, treats over 100 varieties. Profusely illustrated with full page plates. Covers such points as Lilies in History, Classification of Lilies, Geographical Distribution, Suitable Soils, Manures and Fertilizers, Lime and its Effects, the Value of Mulches, Depths to Plant Lilies, Preparation of Soils, Lilies for Special Permanent Purposes, Lilies for Cutting, Insect Pests and Diseases, Propagation, Lilies for Pot Culture and Forcing, Notes on Varieties.

This, the first work on Lily culture in America, has been warmly praised by the Horticultural press of both America and Europe. 144 pages.

Price \$3.00 postpaid from the Author in Weymouth, Mass., or The Florist Publishing Co., South Dearborn Street, Chicago, Ill.

DUTCH AND OTHER HARDY BULBOUS PLANTS

We carry only the highest quality of Dutch and American grown hardy bulbs. Narcissi which are all of American culture are substantially lower in price this season and the quality is splendid, many of these we grow ourselves.

We would appreciate an inspection of our large stocks of these bulbs, most of which will have arrived by September 15. Quite a number of new varieties will be found in this price list.

Where orders are required by mail, customers should include sufficient in their remittance to cover cost of Parcels Post. Large orders are shipped per Express but can be divided into several packages if necessary and go per mail.

MAY FLOWERING OR COTTAGE TULIPS

The May flowering tulips start to bloom about May 15 and some varieties are in fine condition until early June. Some varieties are quite fragrant, all are graceful in habit usually with longer and more pointed buds than other types. They are excellent in clumps in flower borders, some naturalize finely in grass lands, all are quite persistent. Their popularity steadily increases.

	Doz.	100
Adonis. Reflexed very long petals, vivid carmine red with white base	\$.70	\$5.50

procurable,

.20 each, \$2.00 doz., \$15.00 per 100

Fine second sized bulbs for

bedding, .12½ each, \$1.25 doz., \$9.00 per 100

NARCISSI

All narcissi have in recent years been from American sources, and very good bulbs are being produced which bloom extremely well both under glass and outdoors. We grow a goodly number of varieties ourselves and bulbs this season are the best we have ever had. We have made quite an addition to our list this fall as there is a greatly increased interest in all varieties of Narcissi. We would draw special attention to a number of varieties suitable for the rock garden. Narcissi may be planted successfully until December, in fact all of our own stock was planted during that month in 1931 and did amazingly well.

We sell only the finest double nosed bulbs.

LARGE TRUMPET SECTION

	Doz.	100
Emperor. Golden trumpet, deep primrose perianth	\$.80	\$6.00
Empress. Rich yellow trumpet, broad white perianth80	6.00

Campernelle. Large, deep, yellow flowers, forces well50	4.00
Campernelle Giganteus. The finest of the jonquilla family, in size, foliage and perfume superior to all others60	4.50
Campernellen Rugulosus. A much glorified campernelle, rich yellow50	4.00
Campernelle Rugulosus. (flore pleno). A fully double form, very pleasing60	4.50
Golden Sceptre. Yellow, very large golden cup, extra fine ..	.75	6.00

NARCISSUS SUITABLE FOR ROCK GARDENS

We make a specialty of the smaller Narcissi suitable for Rock gardens and our list of varieties will compare favorably in prices and variety with any to be found in the United States. Of some varieties stocks are quite limited and early orders should be placed to secure these.

	Each	Doz.
Bulbocodium. The Hoop Petticoat or Medusas Trumpet daffodils are very charming in the rock garden. We offer several varieties of this type.		
Bulbocodium Citrinus. Beautiful pale citron flowers 6—8 inches high, likes a damp position and enjoys a soil with peat and leaf mold	\$.20	\$2.00
Bulbocodium Monophyllus. Little snowy white flowers of great beauty. Give no manure	.25	2.50
Bulbocodium Conspicuus. Rich golden yellow of hoop petticoat like form and fine rush like foliage. Likes sandy peat	.15	1.50
Canaliculatus. Dainty little gem, give full sunshine. Heads of 3—4 flowers have white perianth and yellow cup, very fragrant25	2.50
Cyclamineus. Rich yellow trumpet, perianth reflexed like a cyclamen. Likes a moist location and a sandy peaty soil ..	.30	3.00
Cyclamineus February Gold. A hybrid from cyclamineus, perianth golden yellow, trumpet tinged with orange50	5.00
Jonquilla Simplex. The original true sweet scented jonquil,		

	Each	Doz.
golden yellow with an exquisite fragrance06	.60
Jonquilla Simplex flore-pleno.		
A double form of the foregoing	.10	.75
Juncifolius. A miniature rush leaved daffodil, 4—5 inches in height, small rich very fragrant yellow flowers20	2.00
Minimus. Smallest of all trumpet daffodils and the first to flower. We had blooms fully expanded on February 25 outdoors in 1933, only 3 inches in height with pure golden trumpets. Succeeds well in loam...	.30	3.00
Minor. A very scarce variety, grows 6 inches high, golden yellow perianth gracefully twisted, trumpet golden75	8.00
Moschatus of Haworth. A charming little daffodil from the Pyrenees, snowy white with a drooping perianth, likes a little shade40	4.00
Nanus. A miniature golden trumpet daffodil 4—5 inches high, about intermediate between minimus and minor in size, very early25	2.50
Serotinus. A very rare October blooming narcissus, stems slender, usually carry 2—3 flowers per stem, silvery white perianth and little pure golden cup. Likes a warm place in the rockery50	5.00
Triandrus Albus. The dainty little "Angels Tears" narcissus, pure white flowers. Likes a rather gritty soil20	2.00
Triandrus Thalia. A hybrid with Triandrus as one of the parents, carries 3—4 flowers per		

	Each	Doz.
stem which are snowy white in color, sufficiently robust to thrive in the average garden border, a truly exquisite variety better known as the "Orchid narcissus"20	2.00
Triandrus Queen of Spain. A delightful variety with nodding canary yellow trumpets, is fine for naturalizing, only 6 inches in height20	2.00
Triandrus Agnes Harvey. A dainty daffodil of drooping habit 1—3 flowers per stem, snowy white, fine for naturalizing near water20	2.00
Triandrus Mrs. Alfred Pearson. White perianth and pale primrose cup, dainty star shaped flowers20	2.00
W. P. Milner. A charming pure white free blooming variety, naturalizes well25	2.50
William Goldring. The "swans neck" daffodil, primrose passing to white and very graceful, quite a robust grower, but its habit makes it fit in well in the rock garden20	2.00
There are other varieties than the foregoing which are often used in rock gardens and are admissible when the garden is large, the list given here is a really selected one suitable for quite small gardens.		

MIXTURES OF NARCISSI FOR NATURALIZING PURPOSES

Choice Mixture containing all types,
 .50 doz., \$4.00 per 100, \$35.00 per 1000
 Choice Mixture containing short trumpet vars,
 \$4.00 per 100, \$35.00 per 1000

Choice Mixture second sized flowering bulbs
all types, \$2.50 per 100, \$22.50 per 1000

NARCISSUS FOR INDOOR CULTURE

	Doz.	100
Paperwhite grandiflora. For forcing in soil, or water	\$.60	\$4.50
Soleil d'or. Golden yellow very fragrant, for pot culture75	6.00

CROCUS

SPRING FLOWERING SECTION

	Doz.	100
Albion. Dark purple, extra fine variety	\$.50	\$4.00
Baron Von Brunow. Deep purple, extra sized flowers ..	.50	4.00
Caroline Chisholm. Splendid pure white variety50	4.00

Pudica. Rich golden yellow50	5.00
Recurva. Interesting Species ..	.40	4.00
	Doz.	100
Meleagris. The Guinea Hen Flower is well suited for naturalizing75	5.00
Meleagris Alba. Charming pure white form for the rock garden75	6.00

GALANTHUS (SNOWDROP)

	Doz.	100
Byzantinus. Very early, large snowy white feathers	\$.50	\$4.00
Elwesii. The largest and finest variety, extra robust50	4.00
Fine second sized bulbs40	3.00
Nivalls Flore-Pleno. Double snowdrops, excellent in grass	.50	4.00

ERANTHIS (WINTER ACONITE)

	Doz.	100
Cilicica. Very distinct, finely divided leaves and large flowers	\$.50	\$3.00
Hyemalis. Golden yellow, one of our very earliest flowers ..	.50	3.00

DUTCH IRIS

These bulbous iris are the results of crossing *Hispanica* on such varieties as *filifolia*, *tingitana*, *lusitanica* and others. They have more robust stems than the Spanish iris, also blooming in advance of them. All of these Iris are fine in the garden being perfectly hardy if planted in well drained ground an average of 4 inches deep. They flower just as the bearded (German) iris are passing. Prices are now within the reach of all.

	Doz.	100
David Bless. Splendid large flowered blue, coming ahead of <i>Imperator</i>	\$.60	\$4.50
D. Haring. Creamy white falls, standards silvery lavender ..	.60	4.50
Golden Glory. Standards golden yellow, falls darker75	6.00
Imperator. Large free flowering dark blue, later than the regular Dutch varieties75	5.50
Poggenbeeck. Dark blue, an especially rich color60	4.50
Van Ravenstein. Pure pearly blue, color of <i>Scabiosa caucasica</i>70	5.50
Wedgewood. Beautiful Wedgewood blue, very early	1.25	10.00
Wedgewood Supreme. A much glorified <i>Imperator</i> , different blue from <i>Wedgewood</i>	2.00	15.00
White Excelsior. Extra large snowy white variety60	4.50

SPANISH IRIS (IRIS HISPANICA)

These bulbous Iris are splendid for culture in the garden flowering immediately after the bearded section (Germanica). Plant late in the fall covering 4 inches. They are perfectly hardy in New England. For forcing they are unexcelled.

	Doz.	100
Cajanus. Canary yellow, orange blotches on falls	\$.50	\$4.00
King of the Blues (Count of Nassau). Fine rich purplish blue	.50	4.00
Prince Henry. Beautiful large purplish bronze60	4.50
Queen Wilhelmina. Very pure white with narrow line of yellow on the falls.50	4.00
Choice Mixture, all colors40	3.00

MISCELLANEOUS IRIS

Iris Anglica. Very rich purplish blue, blooming after the Dutch and Spanish have finished, carries larger flowers than the other types	\$.75	\$6.00
Iris Reticulata. A perfect gem for culture in the rock garden a very early bloomer	2.50	18.00
Iris Reticulata var, Cantab. Of a lovely Cambridge blue color, flowers 10 days earlier than reticulata, carries 2—4 flowers per bulb, in bloom first week in April	4.00	

CAMASSIAS

Camassias are interesting and very attractive hardy bulbous plants from the Western Northern American states. They are best

planted in the fall 3—4 inches deep in any good soil, but avoid fresh manures. They enjoy plenty of moisture during the growing season, in fact in their native habitats they are often standing in water when in flower, through the summer they succeed best if allowed to dry out very thoroughly. They add great interest to the spring bulbous garden.

Leichtlini. Robust variety, much the best of the family, often 3 feet high, flower scapes are usually clear blue but occasionally white or clear \$1.50 \$12.00

CONVALLARIA (LILY OF THE VALLEY)

Fortin's Giant. Far the best variety for outdoor plantings, spikes and bells much larger than the varieties used for forcing.

Strong pips,

1.00 doz., 7.50 per 100, 70.00 per 1,000
Doz. 100

Polygonatum (Solomon's Seal).

Splendid for shady locations,

strong field grown \$2.00 \$15.00

EREMURUS (FOXTAIL LILY)

These strikingly beautiful hardy desert plants come to use from the mountains of Western and Central Asia. My first planting of them in Massachusetts was as long ago as 1900. Their large octopus-like roots should be planted in the fall preferably in well drained soil which should contain plenty of either peat moss or leaf mold with a good addition of sharp sand. Cover the roots about 5 inches and the central crown rather less. Growth

starts very early in the spring and to prevent injury to the shoots draw earth about them and tuck some sort of evergreen branches around them to protect them. Spikes will rise to a height of 10 feet or more on well established plants and their sturdy stalks from which pushes 2—3 feet of flowers in late May are thrilling to all flower lovers. Lay a piece of tar paper over crowns in winter to shed water although they usually do not require this care. Protect with salt hay or leaves over winter.

	Each
Bungei. Golden yellow, a dwarfer grower than others	\$2.50
Elwesianus. Very robust, flowers are soft pink	3.00
Elwesianus Albus. A lovely pure white form, very good grower	4.00
Himalaicus. An extra vigorous grower, color pure white	3.00
Him-Rob. A charming hybrid intermediate between Himalaicus and robustus, has great vigor	4.00
Robustus. Extremely husky grower, color rich rosy pink	4.00
Shelford. An excellent hybrid, very robust	3.00
Sir Michael. Another of the more recent hybrids	3.00
Tubergeni. One of Van Tubergens fine hybrids	4.00

LEUCOJUM

The summer snowflake carries several of the large snowdrop like white bells to a stalk, in foliage and bulbs suggestive of narcissus. Enjoys rather moist ground but thrives in an ordinary perennial border.

	Doz.	100
Aestivum Flowers a month or more later than the true snow-drop and grows much taller ..	\$.75	\$6.00

COLCHICUM

These fall flowering meadow saffrons are often called "fall crocus" but they differ materially from the latter making quite large bulbs which carry quite a number of flowers each, they also grow taller than the true crocus and produce their large leaves the following spring, the regular flowering time is late September and October.

	Each	Doz.
Autumnale. Light blue extra fine variety	\$.35	\$3.00
Speciosum. Deep blue, makes a fine companion for autumnale	.35	3.00

AMARYLLIS

Halli (*Lycoris squamigera*). The hardy amaryllis carrying lovely lavender pink spikes of flower in August, plant 8 inches deep. Bulbs are scarce \$1.00 \$10.00

ANEMONE

St. Brigid Irish Champions. The largest and finest strain of these popular Anemones ever offered in this country, in a wide range of colors, 90 per cent will come double.

.60 per doz., \$4.50 per 100

FREESIAS

	Doz.	100
Golden Daffodil. Very large yellow, extra sized bulbs	\$.50	\$4.00
Elders Giant White. Much the largest and finest white60	4.50
Purity. Still the leading variety for pot culture and cutting40	3.00
Note. Bulbs of Freesias will be ready in late July, they can be planted in pots as late as December. Excellent for house culture.		

NATIVE MATERIAL FOR FALL PLANTING

Cypripedium Acaule. An excellent variety, will thrive well under pine trees. Upper sepals and petals brownish, labellum pinkish purple with dark veinings.

Cypripedium Parviflorum. Bright yellow variety with small flowers.

Cypripedium Pubescens. A beautiful and persistent yellow variety.

Cypripedium Spectabile (Reginae). A truly noble variety, sepals white and roundish, labellum white or pale pink.

Prices of Cypripedium. 20 cents each, \$2.00 per doz. Extra strong clumps 50 cents to \$2.00 each, according to number of pips.

Trillium Erectum. Purple Trillium.

Trillium Grandiflorum. Great snowy Trillium, the finest variety.

Trillium Recurvatum. Prairie Trillium, dark purple, rare.

Trillium Stylosum. Rose Trillium, rosy pink flowers.

Trillium Undulatum. Painted Trillium, early bloomer, flowers have scarlet markings.

Prices of Trilliums. 10 cents each, \$1.00 doz., \$7.50 per 100.

	Each	Doz.
Mertensia Virginica (Virginia Bluebells). Extra strong roots	\$.30	\$3.00
Good flowering roots20	2.00
Sanguinaria Canadensis (Blood-root). Strong flowering roots	.15	1.50

CHOICE IMPORTED DELPHINIUM SEEDS

We import both choicest mixtures and named varieties of the finest English strains. Fresh seeds have just arrived and can be sown in a cold frame now or started during winter under glass.

	per pkt.
Blackmore & Langdon's Gold Medal, the finest strain extant	\$.50
Blackmore & Langdon's Gold Medal. Choice named varieties, dark and pale blue50
Hollyhock Delphinium in choicest mixture	.50
Hollyhock Delphinium in 6 named varieties	.50
Collection of 6 pkts. of the finest named Delphiniums for \$2.00.	

HARDY ROSES

We carry a selection of over 150 varieties of Hardy Roses including all of the best Hybrid Teas, Hybrid Perpetuals, Climbers, Polyanthas, Rugosas, and Species. Late October and November are splendid planting periods. We have many of the leading novelties. Special list on request.

ROCK GARDEN PLANTS

We have in stock a very fine assortment of plants for Rock Gardens including Saxifragas, Drabas, Arenarias, Androsaces, Sempervivums, Sedums, Aubretias, Helianthemums, dwarf Iris, Erinus, Veronicas, Primulas, and other varieties, also hardy Ericas, Pachistimas, Cotoneasters, small leaved Euonymus and other plants.

HARDY HERBACEOUS PERENNIALS

Our exhibits of Herbaceous Perennials in Boston have been awarded a number of gold medals. We have in stock extra fine selections of Peonies, Iris, Delphiniums, Phloxes, Pentstemons, Scabiosas, Sidalceas, Asters, Aconitums, Aquilegias, Hemerocallis, Geums, Doronicums, Gypsophilas and other varieties, all of which will do very much better if planted in fall rather than spring.

We always have in stock a good selection of choice Flowering Shrubs, Fruit Trees, Coniferous and broad leaved Evergreens, and hardy Climbers.

A few specialties always to be found here are:—

	100 Lbs.	Ton
Quality Brand Sheep Manure	\$2.50	\$50.00
Pure Ground Bone	2.75	50.00
Canadian Hardwood Ashes	2.50	45.00
Vigoro, 5 lbs., .50; 25 lbs., 1.75; 50 lbs., 2.75; 100 lbs., 5.00.		
Ideal Holland Peat Moss	The finest brand imported, indispensable for many garden purposes. Bag 1.00, bale 3.50, 10 bales 32.50.	
Screened Oak Leaf Mold,	\$1.00 bushel,	\$2.50 sack.
